work history

Test center administrator
Amarthya Academy

Jul 2007 - Nov 2010
IS Sadan

I worked as an administrator, where my roles and responsibilities are as follows

- Conducting TOEFL on line exam.
- Looking after the maintenance software that runs to take the test.
- Other administrative tasks to ensure that the students finish examination with out any problem.
- Monitored with ETS, ie US-based "Educational Testing Service" to run sample test prior to the exam date to avoid any software related problems during the examination.

Project Assistant
Virtual Labs

Mar 2015 - Sep 2015
IIIT Campus, Gachibowli

Worked as Project assistant and was responsible for the following tasks during my tenure at Virtual Labs.

- Administrative/HR tasks at Virtual lab like, advertising the jobs in job portals, arranging interviews.
- Arrangements for the workshops conducted at Virtual labs and arranging Logistics for the attendees of the such workshops.
- Manage assets and purchases of new assets when needed.
- Monitor the cleanliness of lab.
- Maintenance of attendance and leave record of the staff.
- Maintenance of petty cash and handled reimbursements.

QA Testing
Virtual Labs

Sep 2015 - Current
IIIT Campus, Gachibowli

Virtual Labs(VLEAD) is an MHRD Initiative which aims at making available experiments done in Engineering Colleges in a Virtual form, to all the college students as a adjunct facility to the physical labs.

Excelled in finding and reporting bugs, errors, interoperability flaws and other issues within software applications developed for Virtual labs. base.

As a QA Tester I am in to several Projects which are briefed as follows:

- Testing of the Virtual labs

About the Project:

Virtual Labs is a prestigious project which enables the under graduate students to perform their subject wise experiments virtually. My role towards the project is to make sure that the functionality of the labs reaches the end users effectively. While involved in the project, used various testing methods like, Unit testing, Smoke testing, Integration testing and Systems testing etc.

- Testing of Open edx.

About the Project:

Project done using higher level testing standards. Open Edx is the portal where all the Virtual labs have been ported for the better quality of the labs created by VLEAD. For this project filed 125 issues only in the landing page.

- Testing for VLEAD out reach portal.

About the Project:

Another project done testing at the best of my knowledge. Outreach portal deals the promotional part of the Virtual Labs. Tested this project using several modules of the portal.
